

To help protect your child on the internet

Remember the **GOLDen** rules

Ground rules

- Agree how the internet should be used in your home
- Keep information private – think, would I tell this to a stranger?
- Agree rules about meeting online ‘friends’ in real life
- If it’s not acceptable in real life it shouldn’t be acceptable on line

Online safety

- Use anti-virus and parental monitoring systems
- Know where to get advice – see below
- Activate security and privacy settings

Location

- Internet access should be in a family room, rather than a bedroom
- Know that Internet access can be gained by the use of other devices; such as gaming consoles, mobile phones or the neighbours wireless Internet connection

Dialogue

- Talk to your child about their Internet use
- If you think your child knows more about the Internet – ask them
- Encourage them to talk to you if they have a problem or feel uncomfortable

Keeping Safe in Simple on Social Networking Sites:

- Always keep your profile private
- Never accept friends you don’t know in the real world
- Never post anything which could reveal your identity
- Never agree to meet somebody you only know online without telling a trusted adult
- Always tell someone if you feel threatened or someone makes improper suggestions

For more information or to report an issue relation to bullying please contact your local school
